Please read this manual first for correct installation and operation. This manual should be retained for future reference. The information in this manual was current when published. The manufacturer reserves the right to revise and improve its products. All specifications are therefore subject to change without notice.

PRECAUTIONS

1. Do not install the camera near electric or magnetic fields.

Install the camera away from TV, radio transmitter, magnet, electric motor, transformer, audio speakers since the magnetic fields generate from above devices will distort the video image.

2. Never disassemble the camera nor put impurities in it.

Disassembly or impurities may result in trouble or fire.

3. Never face the camera toward the sun.

Direct sunlight or severe ray may cause fatal damage to sensor and internal circuit.

4. Keep the power cord away from wet and never touch the power cord with wet hands.

Touching the wet power cord with hands or touching the power cord with wet hands may result in electric shock.

5. Never install the camera in areas exposed to water, oil or gas.

Water, oil or gas may result in failure, electric shock or fire.

6. Cleaning

Do not touch the surface of sensor by hand directly. Use a soft cloth to remove the dirt from the camera body. Use lens tissue or a cotton tipped applicator and ethanol to clean the sensor and the camera lens.

7. Do not operate the camera beyond the specified temperature, humidity or power source ratings.

Use the camera at temperatures within $-40^{\circ}\text{C} \sim 50^{\circ}\text{C}$ ($-40^{\circ}\text{F} \sim 122^{\circ}\text{F}$) and humidity between 20%~80%. The input power source is 24VAC .

2. INSTALLATION

This section covers simple steps and detail installation. Please follow instruction for preventing any unnecessary damage.

Simple Steps:

1. Open camera cover.
2. Rotate camera if install on ceiling
3. Drill holes on wall/ceiling. Mount cameras.
4. Connect power and video.
5. Optional connect to EN220 Test Monitor for field testing (monitor is not included).
6. Adjust lens and camera position.
7. Adjust camera setting by using the OSD controller.
8. Put in DESICCANT PACK and close the camera cover for avoiding moisture in the camera.

Detail Installation Steps:

1. Loosen the 4 fix screws on the housing cover by using the attached wrench (Figure 1). Please pay attention not to damage the lens.

Figure 1

2. Remove the camera

Figure 2

To remove the camera, first unplug the wire connection on the back of the camera. Then loosen the 2 locking screws on the camera base, push the camera base to the right (toward heater direction, as shown in Figure 2), remove the camera from the mounting base. Reinstall the camera and the cable while the base mounting is completed.

2.1 Instruction for rotating the camera mounting

- a. Please unscrew fixing screws that hold the camera module.

Figure 3-1

- b. Remove the camera

Figure 3-2

- c. Aim “Ceiling” Mark to “▲” mark on camera lead frame. See figure 3-3.

Figure 3-3

- d. Tighten fixing screws and finished

Figure 3-4

2.2 Mounting Cameras on the Ceiling/Wall

- a. Mount the base to the wall or ceiling, fix the base by the 4 screws in the accessory pack.(see dimension b for drilling dimension). This dome is weighted 1.7kg, please make sure if the mounting is strengthened enough to support it, if not, please reinforce the mounting according to the environment. See figure 4.

Figure 4

b. Take off cable conduit if you need to wire cable through side conduit hole. The camera comes with a conduit plug pre-installed in the PF 1/2 conduit hole on the side. The conduit plug can be removed and installed in the back conduit hole (as shown in Figure 5)

Caution: When used in the environment with high humidity, apply an appropriate gasket or sealant around the conduit connection.

Figure 5

2.3 Conduit cable and Connect Power and Video

- a. If you want to wire cable through side conduit hole. Find the water-proof conduit in the bag and wire power connection cable through it.

Figure 6-1

Figure 6-2

- b. Connect cable conduit to the conduit hole and make it tight.

Figure 6-3

- c. Connect the power supply cable (24VAC), video output to the proper connectors. The extension power has 4 colors for Power +(red), - (white) and Video(yellow), GND(black). ***Please match the colors with terminal board shown as Figure 7. Yellow to yellow, Black to Black, White to white, red to red.*** Wrong connection will damage the camera!!

Figure 7

- d. Connect 24VAC regulated power source to the camera. Please use power extension for connecting to it if the power adapter cable is not long enough.

e. Optional connect to Alarm(Please see figure 8 for terminal functions)

Figure 8

Figure 9

f. **V. Phase adjustment screw** is located on the termination board. The vertical phase may require adjustment to synchronize the vertical phase of the camera with other camera in the system when it is to be used in the line-lock sync mode. Make the adjustment when the vertical phase of the camera does not match with other cameras.

2.4 Adjust Lens zoom and focus and View

- a. Adjust Lens zoom and focus(for vari-focal lens models)

Figure 10

- b. Adjust view angle

The camera can be rotated 360° horizontally, 140° vertically and 60° 3rd axis view angles (as shown in Figure 11). Adjust the proper camera view angle as needed.
